

## Tic Tac Toe (Additional Features)

Maintaining all requirements in the first version of the Tic Tac Toe game previously built, implement the following additional features:

1. Maintain PEP8 standards (no warnings when using pycodestyle)
2. Use version 3.8 of Python
3. The code should be as DRY (don't repeat yourself) as possible
4. Use docstrings to document the purpose of any modules created
5. Game play allows for 1 only with the second player to be a "Computer"
6. Implement code to play as the computer
7. Store game records into a records file when game play is complete
8. Read the records file when the game play values have been set
9. Create a function that can be called to change all the game values after a game is initiated
10. Display game records before the game board each time it is displayed
